View a CMR from the Shipments screen

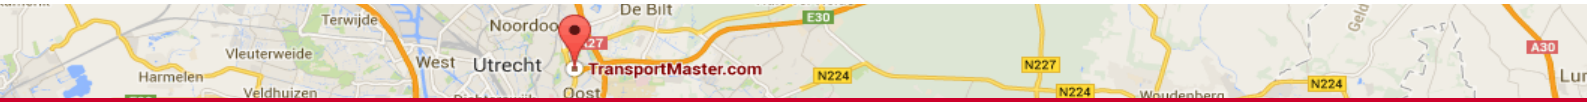

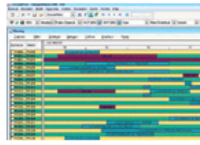

ScanMaster combined with the scan software of KOFAX Express, is a powerful tool for your document management. It is a low cost solution that can be quickly integrated into any organization.

Purchase orders, waybills, invoices and all your other business correspondence is automatically saved after scanning. The system will link the documents to the different screens in TransportMaster. You can now view all your papers directly in TransportMaster. Digitally received documents and even e-mails can also be linked and viewed directly in TransportMaster.

What you need:

- ✓ label printer
- ✓ scanner or multi-functional
- ✓ Kofax Express Scan software
- ✓ the module ScanMaster of TransportMaster.com

Transport Master

ScanMaster - document scanning and processing

How it works

You add a label with a bar code to your paper documents and you scan them. Or add a digital bar code to digital documents. These documents are first filed by the system, then automatically linked to screens in TransportMaster. Also for e-mails a link is created in TransportMaster. You can now view all these documents in the defined screens.

With ScanMaster you optimize your business processes by efficiently managing and processing your documents.

Don't hesitate to contact us for more information or to request a demo.
